

BEFORE

AFTER

I think the image I picked was fine. However, I thought that making the colors and tree more visible would change the mood of the image. I increased the temperature since I noticed that the image had yellow and red around the tree. I increased contrast, decreased whites and increased blacks to make tree more visible.

For the color, I increased saturation and vibrance since I aimed more visible colors. Lastly, for the texture, I increased sharpness and clarity to make the tree more visible.
